

USER - PARTNERSHIP CONTRACT

which will be held on the day mentioned below between

SELMO Technology GmbH, FN 518913 h ,
Gewerbeparkstraße 1/1, 8143 Dobl-Zwaring,

hereinafter referred to as "SELMO", on the one hand, and

.....
.....
.....

hereinafter referred to as "Partner", on the other hand, was concluded as follows:

I. Agreement

The parties agree that SELMO shall audit and assess the partner's suppliers for their capability and the suitability of their products or machines for the application of SELMO technology. For this purpose, the partner, after having obtained the prior consent of the respective supplier, shall provide SELMO with the supplier contact data. SELMO will include these suppliers in its database and carry out a free auditing and evaluation process with regard to suitability for SELMO technology in accordance with the following provisions.

II. Mutual support

In order to achieve the objective of this Agreement, i.e. the implementation by SELMO of the auditing and assessment process referred to in point I. above,

- a) The partner appoints a person responsible for implementation as the contact person for SELMO, who - after the data has been approved and forwarded to SELMO - prepares the partner's suppliers for contact by SELMO;

SELMO - Partnership contract for machine users

- b) After the audit, SELMO prepares an assessment of the respective supplier according to its capabilities in automation, namely
 - I) state of the art" in its technological orientation
 - II) in its documentation and process orientation
 - III) in its performance of project implementation and commissioning times

- c) SELMO offers its services for project management for the software (process modelling) for new plants of the partner and analyses the existing plants or machines within the framework of the partnership. SELMO will also analyse the existing plants or machines within the framework of the partnership, provided that the partner has decided to implement SELMO technology in these plants as well. SELMO supports the partner within the framework of technology transfer projects in the implementation of the specifications by the supplier.

- d) SELMO offers a software standard for the specification of machine suppliers to bring future and existing machines up to a digital standard. The partner grants SELMO the right to use the software as a standard for future new or retrofit projects.

III. Duration of contract

The Partnership Agreement shall be concluded for a limited period with immediate effect until 31.12.20xx (thirty-first of December two thousand ----).
